IDENTIFIERS *Washington

ABSTRACT

Fall 1984 data on enrollments, student characteristics, and personnel at Washington community colleges are provided in this report and contrasted with historical data for fall quarters 1980 through 1983. First, report highlights are presented, indicating: (1) restoration of evening and off-campus enrollment was the principal trend evident in the comparison of fall 1983 to previous quarters, with a 3.5% increase in evening, off-campus full-time equivalent (FTE) enrollment in state-funded courses, and a 14.8% increase in off-campus enrollments; (2) day-time, on-campus enrollment fell by 1.7%; (3) enrollments by students over 30 years old increased by 8,000 persons, while the number of 17 to 20 year old students decreased by 3,300; (4) part-time faculty increased from 37% to 39% of the total number of faculty; and (5) state-supported FTE enrollments increased by 17.7% in basic skills programs. Part I of the report focuses on enrollment, providing data on headcount and FTE enrollment by funding source (i.e., state monies, external grants and contracts, and student fees). Tables provide overviews of enrollments by course intent category, time/location, instructional subject areas, and full-/part-time status; and of FTE faculty by full-/part-time status. Part II presents data on student characteristics, including information on ethnicity, age, sex, veteran status, residency status, and credit hour loads. Part III offers employment status data on faculty and administrative personnel, and classified staff for the system as a whole and by college. (LAL)

HIGHLIGHTS

FALL QUARTER REPORT 1984

Restoration of evening and off-campus enrollment is the principal trend evident in the comparison of Fall 1983 to previous fall quarters. The evening, off-campus full-time-equivalent (FTE) enrollment in state-funded courses increased 3.5 percent and the off-campus enrollment went up 14.8 percent. The daytime, on-campus enrollment fell 1.7 percent.

Related to the restoration of evening and off-campus services is a significant, close to 8,000 person, increase over the last two years in enrollment by students over 30 years old. This is more than offsetting the 3,300 person decline in 17 to 20 year olds, resulting from the decreasing supply of high school graduates.

The same trends were evident in employment. In terms of full-time-equivalents, part-time faculty increased from 37 to 39 percent of the total. Another significant trend is the growth of basic skills programs—adult basic education, high school completion, English-as-a-Second-Language, and remedial programs. State-supported FTE-students in these areas increased by 17.7 percent, while academic FTEs decreased by .6 percent and vocational FTEs went up .1 percent.

FOREWORD

The Washington Community College FALL QUARTER REPORT 1984 is the fifth edition of an annual report published following fall quarter. It is one of two annual informational and reference publications which are intended to answer those questions most frequently asked about the community college system by members of the legislature, state and external agencies, citizens, and college administration, faculty and students.

The second is the Washington Community College ACADEMIC YEAR REPORT which includes information based on the full academic year. It is published following the conclusion of the academic year.

Typically, fall quarter is the focal point for analyses of enrollment trends and the characteristics of the student population. Much of the information presented in the FALL QUARTER REPORT 1984 is in historical context for use in such analyses.

The source of information for this document is the State Board for Community College Education (SBCCE) Management Information System (MIS). Additional information may be obtained by contacting the State Board for Community College Education, 319 Seventh Avenue, FF-11, Olympia, Washington 98504; telephone (206) 753-3665 or SCAN 234-3665.

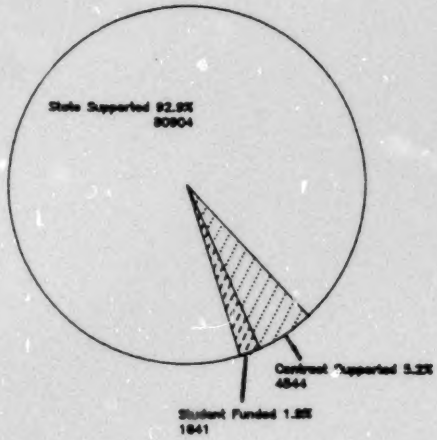
ENROLLMENT

DEFINITIONS

The enrollment information contained in this publication is generally described in terms of source of funding and major categories of instruction. The definitions for these terms are provided below.

FUNDING SOURCES

Instruction offered by Washington community colleges is supported by three basic funding sources: legislative appropriations of state monies; grants and contracts with external organizations; or through fees charged to the students enrolled (community service courses).



CATEGORIES OF INSTRUCTION

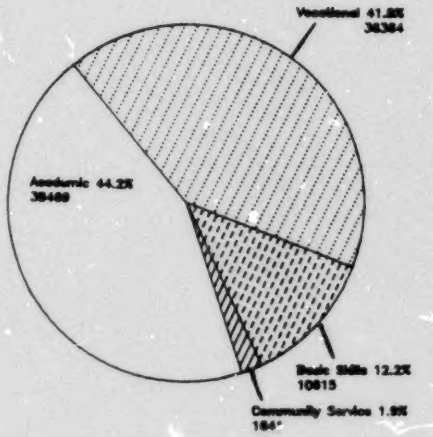
Instructional programs in Washington's community colleges vary because the communities differ in demographic, economic, and geographical characteristics, but courses are generally offered in four basic areas:

Transfer & Vocational Support:

Courses in academic subjects, providing the first two years of baccalaureate programs for students who wish to transfer to four-year institutions, and providing support courses for the vocational programs.

Vocational:

Courses which prepare students for entry-level employment in a wide variety of occupations and which provide retraining and upgrading for working people.



Basic Skills:

Courses which prepare students for college-level courses or enable them to complete eighth grade (ABE) and high school.

Student Funded Community Service:

Courses and activities of an avocational or personal enrichment nature on a self-sustaining (student-funded) basis.

HEADCOUNT AND FTE-STUDENT ENROLLMENT

Washington Community Colleges
Fall Quarters 1980 Thru 1984

Total fall quarter enrollment levels at community colleges have not changed appreciably from 1983. Student headcount increased by 0.4% and full-time equivalent students (one FTE=15 credit hours) increased by 0.1%. The larger increase in headcount compared to FTE enrollment reflects an increase in the number of part-time students.

FTE-STUDENTS BY FUNDING SOURCE

Washington Community Colleges
Fall Quarters 1980 Thru 1984

These figures represent enrollments supported by all funding sources: state appropriations; contracts with external agencies; and student-funded. State funded enrollment increased by 1,238 FTE-students, in marked contrast to the substantial declines experienced during the budget cuts of the 1981-83 biennium. The decline of 784 contract-supported FTEs continues a change started in 1983 of fewer enrollments funded through contracts. Contributing to this change was the reduced level of Federal Job Training Partnership Act enrollment compared to its predecessor, CETA, and also rule changes by the State Board for Community College Education regarding what courses are eligible for contracting.

STUDENT HEADCOUNT ENROLLMENT

Washington Community Colleges
Fall Quarters 1980 Thru 1984

The increase of 4,341 state-supported headcount enrollments was the result of an increase in the numb of part-time students enrolled. This increase was in response to a partial restoration of evening and off-campus courses. The drop in student-funded (community service) enrollments indicates a drop in demand for avocational courses that are offered on a student-funded basis.

FTE-STUDENTS BY COURSE INTENT

Washington Community Colleges
Fall Quarters 1980 Thru 1984

Enrollment in the academic and vocational areas has been stable over the last two years. Continued increasing demand in the basic skills area (high school completion, remedial courses, and Adult Basic Education) made this the major growth area for Fall 1984--up 17.7%, or 1,425 FTE-students over last fall.

FTE-STUDENTS BY COURSE INTENT

Washington Community Colleges
Fall Quarters 1980 Thru 1984

The overall decline of contract supported enrollment is fairly evenly spread over the major instructional areas. This decline continues to reflect the reduced level of funding provided through JTPA, as well as rule changes by the State Board regarding what courses are eligible for contracting.

STATE SUPPORTED FTE-STUDENTS BY TIME AND LOCATION

Washington Community Colleges
Fall Quarters 1980 Thru 1984

Continued restoration of evening and off-campus programs, and increasing demand from the growing "over 30" age group, has resulted in an enrollment increase in these areas of 2,195 FTE-students more than Fall 1983. The decline in day on-campus enrollment reflects the decline in the number of younger aged people in the population (18-24 year olds) who tend to be full-time students enrolled in day on-campus classes.

STATE SUPPORTED FTE-STUDENTS
BY TIME/LOCATION WITHIN COURSE INTENT

Washington Community Colleges
Fall Quarters 1980 Thru 1984

Restoration of part-time faculty and courses in the evening and off-campus has resulted in an overall increase in evening and off-campus students. At off-campus locations, the majority of this increase has been in the academic and basic skills areas, while the majority of evening on-campus growth has been in the vocational area.

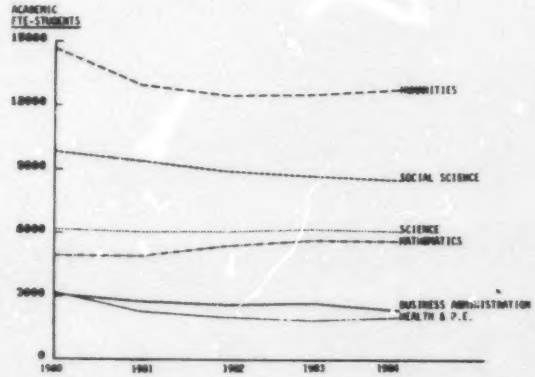
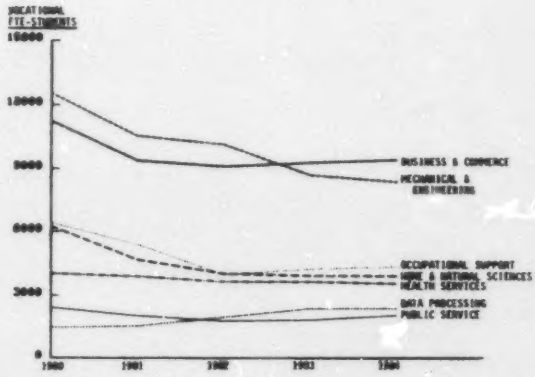
FTE-STUDENTS BY INSTRUCTIONAL SUBJECT AREAS
(STATE SUPPORTED ONLY)

Washington Community Colleges
Fall Quarters 1980 Thru 1984

A further review of the instructional areas by discipline indicates that demand is down in the business area and up in the health, P.E., and humanities. After two years of significant growth, the mathematics area is down slightly.



In the vocational area, demand weakness continued from last fall in the mechanical and engineering technologies--the category that includes construction-related programs, automotive and diesel mechanics, and welding. This weakness is primarily attributed to the lack of activity in construction and the poor job prospects in those occupations. After several years of strong growth in the data processing area, demand appears to have levelled off this fall.



A significant growth trend in the fall enrollment is in the basic skills programs, particularly in the Adult Basic Education (ABE) (below eighth grade) level courses. ABE has increased nearly 2,000 FTEs, or 55% over the last three years.

STUDENT CHARACTERISTICS

STUDENT CHARACTERISTICS

FOR

STUDENTS ENROLLED IN STATE SUPPORTED
OR CONTRACTED CLASSES
(EXCLUDES STUDENT FUNDED [COMMUNITY SERVICE]
CLASS ENROLLMENTS)

Since fall quarter enrollment is considered representative of the actual number of students enrolled in community colleges during an academic year, analyses of the population being served typically involve data collected that quarter. Student characteristics such as age groups, gender, ethnic background, and credit-hour load are among those of interest in planning and forecasting. Tables 12 through 22 offer systemwide and detailed information related to Washington's community college student population.

ACADEMIC, VOCATIONAL, AND BASIC SKILLS
STUDENTS BY FULL-TIME/PART-TIME STATUS

Washington Community Colleges
Fall Quarters 1980 Thru 1984

Fall Quarter 1984 continued the restoration of services to part-time students that began in Fall 1983. This restoration is designed to make community college classes more available to students who are maintaining full or part-time jobs while attending college. This shift is accompanied by enrollment growth in the older age groups and reductions in day-on-campus classes.

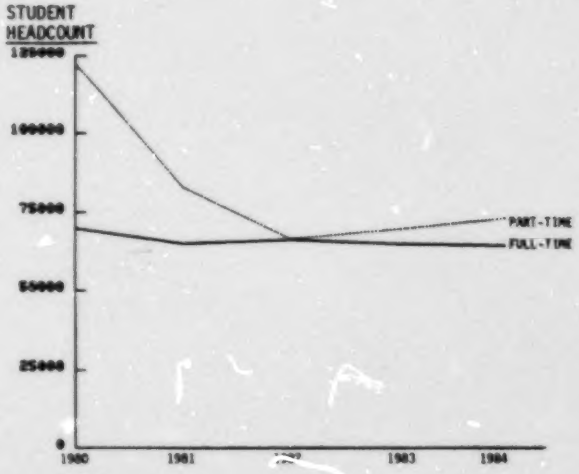

TABLE 12: ACADEMIC, VOCATIONAL, AND BASIC SKILLS

ACADEMIC, VOCATIONAL, AND BASIC SKILLS STUDENT HEADCOUNT BY AGE GROUPS

Washington Community Colleges
Fall Quarters 1980 Thru 1984

This table shows the decline in the enrollments in the younger age groups and the restoration of service to part-time students in the "30 plus" age group. This is consistent with the shift from full-time to part-time students described earlier (See Table 12). It is also consistent with the decline in the number of younger aged people, and fewer high school graduates in the overall state population.

ACADEMIC, VOCATIONAL, AND BASIC SKILLS FTE-STUDENTS BY AGE GROUPS

Washington Community Colleges
Fall Quarters 1980 Thru 1984

The dramatic increase in enrollment by students over 30 years old is offsetting the decline in 17 to 20 year olds resulting from the decreasing supply of high school graduates. The majority of the older students are attending on a part-time basis in the evening and off-campus programs that are being restored after large cuts in 1981 and 1982.

ACADEMIC, VOCATIONAL, AND BASIC SKILLS ETHNIC MINORITY STUDENTS

Washington Community Colleges
Fall Quarters 1980 Thru 1984

Ethnic minority enrollment continued to represent an increasing share of the total enrollment--from 8% to 12% over the last five years. The two groups responsible for the majority of the growth are Asian Americans and Hispanic Americans.

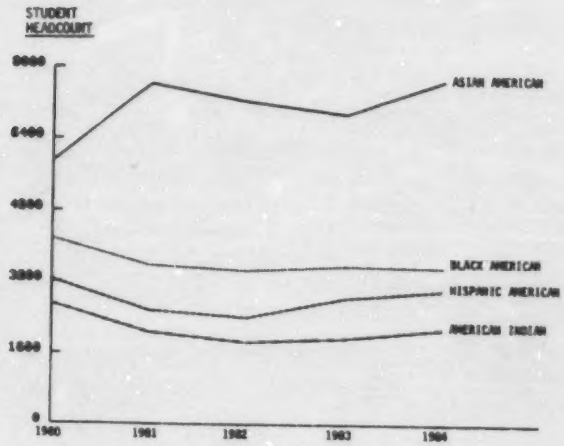

TABLE 15: ACADEMIC, VOCATIONAL, AND BASIC SKILLS ETHNIC MINORITY STUDENTS

ACADEMIC, VOCATIONAL, AND BASIC SKILLS STUDENT HEADCOUNT BY SEX

Washington Community Colleges
Fall Quarters 1980 Thru 1984

Significant increases in enrollment by female students is more than offsetting a slight decrease in male enrollments. Women were more severely impacted by the 1981 reductions in evening and off-campus programs. As they are being restored, so is female enrollment.

III

PERSONNEL

PERSONNEL

Faculty and Administrative Personnel

Each college employs and certifies its own teaching and administrative staff in accordance with minimum standards adopted by the State Board for Community College Education. Community college faculty are eligible for the award of tenure by district boards of trustees after a probationary period of up to three years, during which evaluation of their performance is conducted by review committees composed of administrators, faculty members, and students. Information on faculty and administrators refers to staff members exempted from jurisdiction of the Higher Education Personnel Board civil service merit system, as described below.

Classified Personnel

Classified personnel referred to in this section may be defined as those civil service employees paid and working under a set of conditions determined by the Higher Education Personnel Board (HEPB). The HEPB provides a system of personnel administration for higher education institutions based on merit principles (Title 251 WAC). It is composed of three members appointed by the Governor, subject to confirmation by the Senate, who serve six-year terms.

Tables 23 through 28 on the following pages provide information on Washington community college faculty, administrative, and classified personnel.

FACULTY & ADMINISTRATIVE STAFF HEADCOUNT BY EMPLOYMENT STATUS

Washington Community Colleges
Fall Quarters 1980 Thru 1984

Over the last two years, the number of part-time faculty and administrative staff has increased by 437, while the number employed full-time has increased by only 65. This reflects the emphasis that has been placed on restoration of evening and off-campus courses which are primarily taught by part-time faculty.

HEPB CLASSIFIED STAFF HEADCOUNT BY EMPLOYMENT STATUS

Washington Community Colleges
Fall Quarters 1980 Thru 1984

Staff that were cut during 1981-83 continued to be replaced in Fall, 1984--particularly the full-time positions. Over the last three years 184 full-time support staff have been added, while part-time staff levels have stayed basically the same.
